The Company

PointClickCare is a recognized leader in healthcare information systems and as such has a fast-paced, success-oriented work environment fueled by the talent, skills, and expertise of our employees. We offer a competitive salary, performance-based incentives, career development opportunities and a comprehensive benefits package.

Work with the best!

PointClickCare's dynamic workplace, along with explosive industry growth, provides a high energy, focused environment that translates into unlimited professional opportunities. Employees are encouraged to develop new ideas, new approaches, and new abilities. The entrepreneurial atmosphere is just part of what makes PointClickCare an exciting and motivating place to work. At PointClickCare, the focus is on complete customer satisfaction, and we work very hard to achieve it. This means that cooperative teamwork is the basis of everything we do. It helps us reach our goals while maintaining excellent relationships with our customers, our partners, and our fellow employees.

Job description:

The ideal candidate will be a highly motivated individual with deep analytical and problem solving skills, and have hands-on experience utilizing advanced reporting and analytical tools to support the implementation of data presentation and decision-making Business Intelligence (BI) projects. As a member of the PointClickCare Engineering Team, you will be part of a fast-paced environment committed to delivering critical strategic and operating insights to key business executives and decision makers. You will utilize Java/SQL Server BI Tools and related applications to tap into the company's data resources and build an essential library of standard and custom reports. Teamwork is essential as this position involves extensive interaction and collaboration with members of other development teams and business units. This role requires a positive, enthusiastic, results-oriented professional with excellent attention to details, a passion for owning and producing top-quality deliverables, and a disciplined work ethic for meeting deadlines and commitments.

More on next page >

Duties and Responsibilities:

- Develop and maintain BI reports, dashboards and end-user applications.
- Design, develop and implement BI systems enabling non-technical users to leverage data for strategic decision-making.
- Utilize various reporting tools to deliver insights to targeted audiences.
- Stay up to speed on the latest reporting technologies and facilitate plans to incorporate new features in overall product usage.
- Be involved in full lifecycle development and implementation of the company's BI reporting and analytical services.
- Design, develop and implement reporting and analysis environment, including template-driven and parameterized reports.
- Develop ad hoc interfaces enabling end-users to generate their own reports.
- Perform extensive QA on data and reports.
- Resolve user-identified functional and technical issues relating to reporting services.
- Configure new projects and model data for data warehouse and BI purposes.
- Create, test and troubleshoot reports

Qualifications:

- This position requires a BA/BS in Computer Science, Math, Physics, Engineering, Economics or related field
- 3-5 years experience in a technical/analytical role
- 3-5 years of report development, administration, and implementation experience

Essential Qualifications:

- Java 1.5
- MS SQL Server 2005/Reporting
- Eclipse IDE
- Jasper Reports
- Other Enterprise Reporting Toolkits

We offer a competitive salary plus commission, performance-based incentives, career development opportunities and a comprehensive benefits package. We invite you to send your resume and cover letter (quote the position title in the subject line) in confidence to:
