

**POINTCLICKCARE ONCE AGAIN RANKED AMONG CANADA'S FASTEST
GROWING COMPANIES IN THE DELOITTE TECHNOLOGY FAST 50**

Long Term Care Industry Benefits From Innovative Solutions

(Mississauga, September 25, 2008) – PointClickCare (Wescom Solutions Inc.) today announced that for the third year in a row the company is ranked among the [Deloitte Technology Fast 50](#), a ranking of the 50 fastest growing technology companies in Canada. Last year, PointClickCare was ranked 36 and has continued to maintain its presence in the Deloitte Technology Fast 50, with a rank of 35 for 2008. The ranking is based on the percentage of revenue growth over five years.

“Transforming technological innovation into business success is hard, and it’s especially difficult to sustain such rapid revenue growth over five years. PointClickCare has rapidly built a highly successful company in the Canadian technology industry and we applaud their dedication and ability to transform their vision into reality,” said John Ruffolo, National Leader, Technology, Media & Telecommunications Industry Group, Deloitte.

PointClickCare’s Software as a Service (SaaS) delivery model is being rapidly adopted within the North American long-term care market for its simple interface that is as easy to use as eBay. SaaS applications are owned, managed and maintained remotely and meant for mass-use in multiple locations. The software appeals to the long-term care industry, whose members stereotypically have low budgets, lack necessary hardware and are staffed by individuals who have little access to technical training.

“Recent figures show that 87 per cent of the top 10 Canadian chain beds and 41 per cent of the U.S.’s top 10 chain beds are now using PointClickCare’s SaaS model,” said Mike Wessinger, CEO, PointClickCare. “We’ve reached a tipping point with a clear trend towards companies embracing the strategic use of technology that moves them away from having to install and maintain their own software. Companies spend a huge chunk of their total IT budget

just on maintaining and running existing systems and software infrastructure.”

SaaS eliminates this need completely by delivering the application completely over the Internet with no need for the Providers to buy, install or maintain any hardware or software. . PointClickCare provides electronic health records, medication administration, and financial applications. The company expects additional applications of its software will be developed in the future.

To qualify for the Deloitte Technology Fast 50 ranking, companies must have been in business for at least five years, have revenues of at least \$5 million, be headquartered in Canada, own proprietary technology, and conduct research and development activities in Canada. A panel of industry experts evaluates and judges companies based on four key criteria: competitive advantage; size, growth, and market attractiveness; management effectiveness and organization; and financial performance.

About PointClickCare:

PointClickCare is the leading electronic health records and business office software for the Long-Term Care industry. PointClickCare Software-as-a Service (SaaS) has been online serving providers of all sizes since 2000 and is used by over 3,300 Long-Term Care centers in 40 U.S. states and across Canada serving over 300,000 residents.

About the Deloitte Technology Fast 50:

The Deloitte Technology Fast 50 program is Canada’s pre-eminent technology awards program. Celebrating business growth, innovation and entrepreneurship, the program features four distinct categories including the Technology Fast 50 Ranking, Companies-to-Watch Awards (early-stage Canadian tech companies in business less than five years, with the potential to be a future Deloitte Technology Fast 50 candidate), Leadership Awards (companies that demonstrate technological leadership in four industry subcategories: hardware/semiconductor, software, telecommunications and emerging technologies) and the Deloitte Technology Green 15 Awards (Canada’s leading GreenTech companies that promote a more efficient use

and re-use of the earth's resources in industrial production and consumption). Program sponsors include Deloitte, Gowlings, GrowthWorks, RBC Capital Markets, Wellington Financial, Stonewood Group, CATAAlliance and IGLOO. For further information, visit www.fast50.ca.
